

# Will my brackets fit on a new 8R Tractor?

**Yes!!\*** they will.

There are 3 things we need to do.

- 1.) New top brace arms. (Customer will use same rod, bolts, and hardware)
- 2.) Block needs to be 5/8 in wider. (Add block spacers)
- 3.) A new hole needs to be drilled with a mag drill. (2 inches below the TOP BACK HOLE on each Bracket. The steel gusset on the front side will also have to be trimmed.)

Conversion Kit for going from 8000 series to an 8R

\$750.00

New hole 2" below top hole

\* The regular Front dual brackets will not fit the 8RX
